The diagram shows a building footprint with several rectangular sections. The dimensions and area calculations are as follows:

- Top Section (WDK):** A rectangle with a width of 16 and a height of 18. The area is calculated as $16 \times 18 = 288$ sf.
- Bottom Section (BAS):** A large rectangle with a width of 42 and a height of 21. The area is calculated as $42 \times 21 = 882$ sf.
- Right Section (FGR):** A rectangle with a width of 23 and a height of 27. The area is calculated as $23 \times 27 = 621$ sf.
- Bottom Right Section:** A rectangle with a width of 9 and a height of 4. The area is calculated as $9 \times 4 = 36$ sf.

The total area of the building footprint is the sum of these sections: $288 + 882 + 621 + 36 = 1827$ sf.
